SCOOGS (Select Committee on GRAS Substances)

This database allows access to opinions and conclusions from 115 SCOOGS reports* **published between 1972-1980** on the safety of over 370 Generally Recognized As Safe (GRAS) food substances. The GRAS ingredient reviews were conducted by the Select Committee in response to a 1969 White House directive by President Richard M. Nixon (see [History of GRAS and SCOOGS⁶](#)).

The SCOOGS database allows users to search for the SCOOGS opinion and conclusion, and includes the United States Code of Federal Regulations (21 CFR) citation for those GRAS food substances that have been codified in the CFR. Many of the SCOOGS reports reviewed have more than one GRAS substance and each substance was evaluated and assigned its own individual type of conclusion on safety; Type 1, 2, 3, 4, or 5, as shown in the table below.**

The SCOOGS Conclusions were made by scientific experts outside of FDA. The complete background of the Select Committee is described in the History of GRAS and SCOOGS.

Search and display hints:

- Select the GRAS substance below to view the record details, including the SCOOGS opinion.
- Select the CFR reference below to view the 21 CFR regulations.
- Select the NTIS Accession Number below to retrieve the full report from NTIS.
- To sort by a specific field, click on the column header for that field.
- To browse the records, use the Show All, First/Previous/Next/Last, and Jump To options at the bottom of the data table.
- To search for a specific substance/term, enter the term in the Search box and select Show Items to display only those records that contain the selected term.

[Download data⁷](#) from this searchable database in Excel format. If you need help accessing information in different file formats, see [Instructions for Downloading Viewers and Players⁸](#).

Show 50 records at a time¹⁰⁵⁴**Definitions of labels**

- GRAS Substances:** A food substance that is not subject to premarket review and approval by FDA because it is generally recognized, by qualified experts, to be safe under the intended conditions of use.
- SCOGS Report Number:** Number of the report that contains details of the safety studies that formed the basis of the opinion made by the committee.
- CAS Reg. No. or other ID Code:** Chemical Abstract Services (CAS) Registry Number for the substance or a numerical code assigned by CFSAN to those substances that do not have a CAS Registry Number (977nnn-nn-n series).

- **Year of Report:** The year that the SCOGS report was issued.
- **SCOGS Type of Conclusion:** Opinion and Conclusion by the Select Committee on GRAS Substance Review about the safety of a GRAS substance. See SCOGS Conclusions.
- **21 CFR Regulation:** Citation in [Title 21 of the U.S. Code of Federal Regulations](#)¹⁰⁵⁵ if the substance is subject to a regulation.
- ***NTIS Accession Number:** Order number of the full report containing details of the safety studies that formed the basis of the opinions and conclusions that is available from the [National Technical Information Service](#)¹⁰⁵⁶ (NTIS); search the accession number in the [NTRL \(National Technical Reports Library\)](#)¹⁰⁵⁷.

****SCOGS Type of Conclusion Definition**

- | | |
|----------|---|
| 1 | There is no evidence in the available information on [substance] that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when they are used at levels that are now current or might reasonably be expected in the future. |
| 2 | There is no evidence in the available information on [substance] that demonstrates a hazard to the public when it is used at levels that are now current and in the manner now practiced. However, it is not possible to determine, without additional data, whether a significant increase in consumption would constitute a dietary hazard. |
| 3 | While no evidence in the available information on [substance] demonstrates a hazard to the public when it is used at levels that are now current and in the manner now practiced, uncertainties exist requiring that additional studies be conducted. |
| 4 | The evidence on [substance] is insufficient to determine that the adverse effects reported are not deleterious to the public health should it be used at former levels and in the manner formerly practiced. |
| 5 | In view of the almost complete lack of biological studies, the Select Committee has insufficient data upon which to evaluate the safety of [substance] as a [intended use]. |
